

# The Alchemist's Codex

This Codex gathers the core metaphors, facts, and big ideas students have explored throughout the unit. It acts as their “guidebook” as they prepare their broadcasts and campaigns in Lesson 8.

## ☒ 1. THE SCALE

### “One Spark Can Light Many Flames”

#### **1 Donor = Up to 7 Lives Saved**

*(From Lesson 1: The Domino Effect)*

One single act of kindness can ripple across many lives.

A donor may restore breath, sight, movement, strength, or time.

This is why donation is seen as a rare, powerful gift, not just a medical procedure.

## ☒ 2. THE CATALYST

### “A Conversation Unlocks the Chain Reaction”

#### **8 out of 10 families say YES if they know the person’s wishes**

*(From Lesson 5: The Catalyst of Consent)*

Talking with your family is the key that “activates” the decision.

Certainty reduces stress and increases confidence.

Even a short conversation at home can move a family from 40% → 80% consent.

## ☒ 3. THE TIMELINE

### “The Gift That Restores the Future Map”

#### **Donation helps young people reclaim their “future timeline.”**

*(From Lesson 4: The Hourglass – Time Restored)*

Many recipients are young people whose futures were paused by illness.

Donation can allow them to return to school, sport, friendships, and milestones.

The “Future Map” is a symbol of how the gift restores possibility and hope.

## ☒ 4. THE SYSTEM

### “Alchemy Is Rare — And So Is Donation”

#### **Donation is a rare and special event, requiring the perfect circumstances.**

*(From Lesson 3: The Vault & The System)*

Key facts students should remember:

Only a small number of people can become organ donors (specific medical conditions required).

This is why every donor is considered a hero, and every decision matters.

The system relies on teams of specialists — the “Guild of Helpers” — working together.
