

ROLL AND TELL:

Let's Chat Like a Donate Buddy!

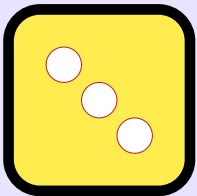

Let's get to know each other Donate Buddies style!
Roll the die and answer a fun question about
kindness, heroes, and saving lives. ❤️🌈

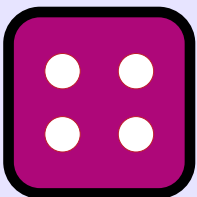

What's something kind someone has done for you?

If you could help someone feel better instantly,
what would you do?

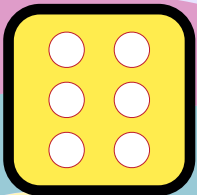

If you were a Donate Buddy superhero,
what would your powers be?

Have you ever helped someone? What did you do?

If you could visit someone in hospital to cheer them up,
what would you bring?

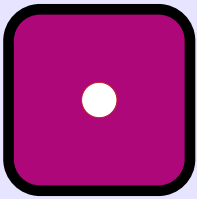

What would you say to a friend to explain what organ
donation means?

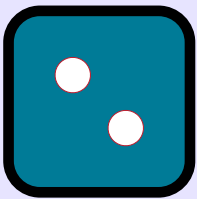

ROLL AND TELL: Donation Edition!

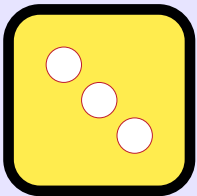

Roll the die and answer a question all about organ and tissue donation, being a hero, and helping others heal. 🦯 ♀️ ❤️ 🦯 ♂️

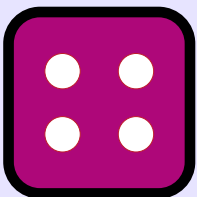

What is one thing you've learned about organ or tissue donation?

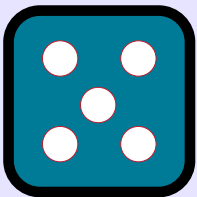

Why do you think some people need a new organ to stay healthy?

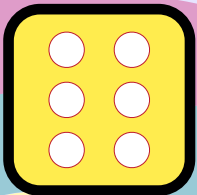

What body part do you think would be most amazing to donate — and why?

If someone you love became a donor, how would that make them a hero?

How can you start a conversation about donation with your family?

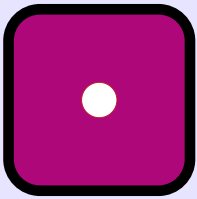

What would you say to thank a donor family for their special gift?

ROLL AND TELL:

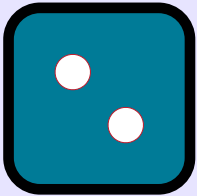

Amazing Body Facts!

Roll the die and answer a question all about organ and tissue donation, being a hero, and helping others heal. 🦯 ♀️ ❤️ 🦯 ♂️

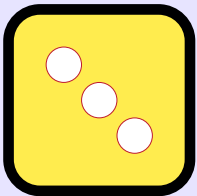

Your heart beats around 100,000 times a day!
What would happen if it stopped?

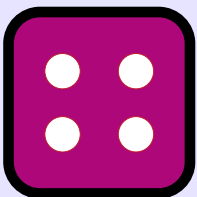

Which one
would YOU
want to learn
more about?

Lungs are like balloons — they help you breathe in oxygen.
Can you take a deep breath like a superhero?

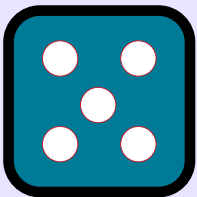

Your kidneys clean your blood — they're like your body's
tiny washing machines! Why do you think that's important?

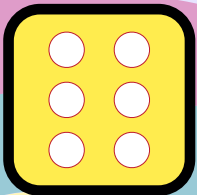

Corneas are the clear “windows” at the front of your eyes.
Did you know corneas can be donated
to help someone see again?

Can you act
out or draw
one of these?

Skin is your body's biggest organ!
Can you name 3 things your skin protects you from?

Bones, heart valves, and tendons are types of tissue
that can help someone heal. How cool is that?
