

# The Consent Gap Graph

## The Consent Gap in Australia

A simple visual comparing family consent rates when wishes are known vs unknown.

### “Family Consent Rates in Australia: Known Wish vs Unknown Wish”

#### Explanation Box (Include under the graph)

##### Understanding the Consent Gap

- When families know their loved one's donation decision → 80% say yes.
- When families don't know → consent drops to 44%.

This difference is called The Consent Gap – and it shows why conversations matter.

#### Key Message for Students

A single conversation almost doubles the chance of your wishes being honoured.
